

Remote Wipe Microsoft ActiveSync Mobile Devices

Admin Guide

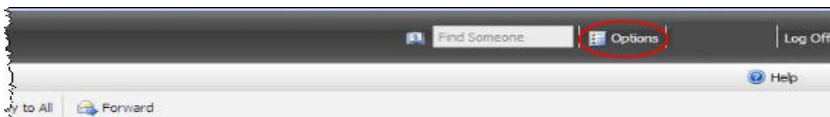

Remote Wipe Microsoft ActiveSync Mobile Devices

NOTE: This process includes Apple iPhones that are configured with the Exchange connection.

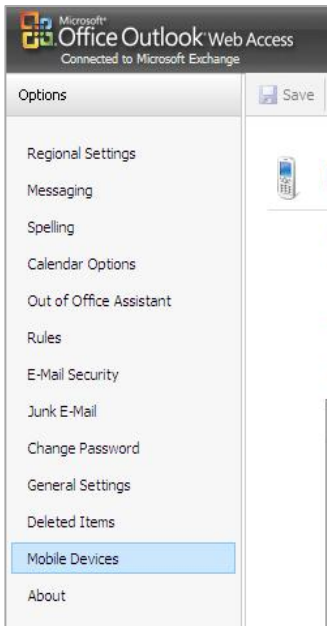

1. Login to Outlook Web Access.

2. Select **Options** on the top-right corner of Outlook Web Access.

3. Select **Mobile Devices** from the left-hand menu.

4. Select the device from which you would like to "wipe all data" and select the option for **Wipe All Data from Device**.

You will receive a confirmation email when complete.

5. When you receive the email, you may then select the option to **Remove Device from List**.
